WALK-THE-PLANK® RODENT TRAP

1. Take a 5-gallon pail with 3" - 4" of water, some bird seed, oats or cocoa puffs and a "plank".

2. Put (floating) grain on water until no water is seen; then put the plank up to the edge. Rodents will climb up and dive in. You will need a larger container and more water to trap rats.

Note: You can lightly cover the pail and plank with corn oil to make it more attractive to rodents.

The 2-Liter Wasp, Roach, Mouse and Miscellaneous Pest Trap

1. Take one clear 2-liter bottle, some duct tape and a pair of scissors.

2. Cut off the top of the 2-liter bottle where it curves.

3. Invert the top portion of the bottle and tape the top portion inside the remaining bottle with duct tape so it looks like a funnel.

4. The completed wasp, stinging insect, roach and mouse trap with 2" - 3" of sweet pop or beer or juice in the bottom.

Remember, your greatest “tool” is your mind and imagination. Your brain is 250,000 times greater than that of a insect pest; use your brain and not “registered” toxins/poisons and you will always win. Use only “registered” toxins/poisons and you will always lose. The choice is yours. Choose well!

**Other Enzyme
Cleaner**

Enzyme Cleaners

**Which would you
want in your
home?**

**Our Enzyme
Cleaner**

The fact that enzyme cleaners are great for cleaning is becoming more and more evident. The problem is most enzyme cleaners that are on the market today, look like the picture on the left and smell quite “funky”. Especially as they “age” or are exposed to the air. Just try to get a list of ingredients and/or a certificate of analysis on “their” enzyme cleaner.

Safe Solutions, Inc. has developed an extremely improved enzyme cleaner (picture on right). It looks and smells clean. You will not believe how clean and fresh this improved enzyme cleaner can make your home, clothes, carpets, pets and office look and smell today. Be honest, which enzyme cleaning product looks like it should be your choice of an all-purpose cleaner? Safe Solutions, Inc. gives you a “Standard of Quality” unmatched by any of its “competitors”!

Safe Solution’s Enzyme Cleaner Ingredients: Purified water, anionic/nonionic surfactant blend, glycerin, enzymes, peppermint oil.
