## World News

### India

After Dr. Chakradhar and Dr. Jagadish, who are working in the heart of India, received our Magnascent Iodine, they wrote to Magnascent with this amazing story of how Energized Iodine is helping with cysts.

*Dear John,*

One lady that had cysts in her breasts with enlarged lymph nodes in the axilla is responding with nascent iodine. She said earlier she had never improved with [other treatments] in her enlarged lymph nodes, but now it seems to be disappearing and the pain is also less. This is very good and exciting news for us.

Many patients are saying [they see] an increase in their energy level. Nascent Iodine is very promising . .

With warm regards,  
Dr. Chakradhar and Dr. Jagadish

### Australia/New Zealand

Magnascent.com is proud to announce Dr. Paula Walker of Blue Valley, New Zealand as a distributor for Australia and New Zealand. She will soon have her website up and running.

Dr. Walker is doing exciting work with Magnascent Iodine. She has used it in several ways, but the most dramatic was with an infected little finger. The local hospital was prepared to amputate the finger, but Dr. Walker was able to save it by the oral ingestion of nascent iodine drops that killed the infection.

## Zambia

Reverend Steven Fisher, a missionary for over 45 years to Africa, has just returned from Zambia for a conference in Oklahoma with other missionaries.

Magnascent's CEO John Brookshire also traveled to the Oklahoma conference so that he could meet his longtime friend Rev. Fisher.

When John and Steven first met John was inspired to help the people of Africa with the ever present problem of malaria. John researched, studied and learned of a remedy that was discovered by Dr. Sukar Bisey in 1926 {For more on Dr. Bisey see <http://www.magnascent.com/History.htm> .} John took the recipe and resurrected it. He began producing the remedy and giving bottles to friends, family, and to Rev. Fisher for testing on malaria.

When the Rev. Fisher started using Magnascent's Nascent Iodine in Africa he was the first to report success with severe malaria and even kidney disease. Since then the Reverend has given Magnascent's Nascent Iodine rave reviews on treating malaria. In fact, he confirms his treatment has worked by doing blood tests on his patients to make sure the malaria is gone from their system. After the conference was over Mr. Brookshire gave Rev. Fisher another 50 one ounce bottles as the Rev. will be returning to Zambia soon to continue his work there.

Once we all arrived back at work we decided to concentrate on bringing Magnascent throughout the world. Currently we are fulfilling that goal with Distributors in England, Canada, South America and throughout the United States.

Did you know it is a fact that in both men and women iodine is stored in our thyroids and our breasts. But, if we drink soda's or coffee. . . . these will wash away the iodine and use this space for bromides, chlorine and floride. It is like taking gold our of your vault and replacing it with tokens.

Because we have left our vault unattended one in 7 women are affected by breast cancer and cystic fibrosis and one in three men are affected by prostate cancer.

**TAKE BACK THE GOLD YOUR BODY NEEDS**
