

**Ancient wisdom lost in time!  
21st century science has taken over!  
Or has it?**

Over the years we, the middle-aged, all heard rumors of cars that ran from water, hydrogen, yet the conspiracy theory was it got covered up, bought by large corporations so the oil industry and investment could be protected. Electricity from panels, how can this be possible? Cars that go 500 kilometers on a few cups of fuel all considered impossible - is now a reality. The same conspiracy theories now viewed by alternative health practitioners. What an awakening over the last few decades.

All these so-called fantasies are today taken for granted. In the past, lifetimes were dedicated to solving daily challenges and disease, and if someone came up with a solution, or a perceived solution, all other projects were dropped - well what was the point in continuing. The problem is not in finding a solution to cure cancer. That may shock you. The problem is in proving your findings, over time, with no back-up funding. So we are forced then to operate out of the traditional medical model, then only to be labeled quacks.

Well I can tell you, it is nothing less than belief and passion that drive alternative thinking people to solve this riddle. The traditional model is making progress; with early detection cancers can be removed with a positive prognosis. But unfortunately metastatic cancers still have a very low success rate for a positive outcome, and sadly, shrinkage is still considered a success and the reason chemotherapy is often used without the thought of quality of life. In fact, if I had cancer I have a complete belief that doing nothing would give me a better outcome than putting myself on a platter for the traditional chemotherapy and radiation treatments.

Then there is the desire to live, to stay a little longer, or possibly beat cancer using alternatives. After a decade in the industry, today I see how easy people are led astray. Someone drank this special juice and then became cancer free. Please open your eyes; no one product holds all the answers to curing cancer, nor do I believe one alternative cancer therapy has the answers for all cancers. Let's first view cancer, what is it?

Cancer is by definition a healing crisis in the body. An area that as a result of ??something?? and has had ongoing inability to heal, thus cancer is formed. Theorized in Edward Griffith's

book and Philip Day's book as tripoblast, the same cells that are found in the fast growing cells of a newly forming fetus as well as in large quantities when we have an injury or surgery, these cells play an important role in the quick growth of cells to repair the body.

### **Let's look at the cause and why this is important?**

Well let's face it, if you don't eliminate the cause and it still is getting into your system, do you think you will win the battle? Let's take smoking. If it happened to cause the aggravation in the lung, and this was ongoing, eventually turning into cancer, if you still smoke, you can see how it would be difficult to believe the cancer could be cured?

If the cancer was caused by electromagnetic current like living under power lines, again, it would have to go or you will have to move. If a brain tumor was caused by a mobile phone, it would have to go, don't you agree? And I wouldn't wonder if it's true or not, I would just play it safe and get rid of the phone! If your cancer was caused by xeno-estrogens that are given off in reheated plastics and soft plastics, or by chemicals washed off from your roof into water supplies, or food imported from countries where high chemicals are sprayed onto crops - if you still had these chemicals entering your body, and they were the initial fuel that caused the cancer, you have little chance of putting out the fire if you don't eliminate them. If you took antacids to put out the fire of poor eating habits, thus causing your body to increase the acid production required for digesting your food, and you did this on an ongoing basis, and this was the cause of your esophagus cancer, you would have to stop this to eliminate the cause. If your cancer was caused by parasites, and the parasite was never eliminated, what chance would you have? I think you understand the idea now. Eliminating the cause, or possible cause, is IMPORTANT whatever path you choose to go, traditional, complementary or alternative.

### **Then there are the buried alternatives!**

Making a way now is a result of dedicated people, mostly well-educated, pushing hard to cause an awakening in all of us. Motivated by this news, many then believe this is the cure, B17, Cesium, ozone, and so on. Well I have seen miracles using these on their own. But truly it is hit or miss! Sadly I can't tell you if it will work for you or not; I can tell you though, that I believe all of the alternatives we have listed here on their own have worked with some clients I have worked with, completely eliminating any signs of cancer. Equally in some cancers they haven't worked. This ancient wisdom passed down from past scientists and medical practitioners like the Cesium High pH Theory by the late Aubrey Keith Brewer, Ph.D., and later continued by an employee at that time - Dr. Sartori. Then there is laetrile, also referred to as Vitamin B17 by Dr. Krebs and later publicized by G. Edward Griffin in "Cancer The Winnable War," and later by Philip Day from Credence in "Cancer – Why I'm Still Dying To Know The Truth." Then there are many herbal teas and herbs and parasite-eliminating promoted books on cancer, too many to mention. These all seem to have merit and reported benefits.

### **Has a Layman found the solution?**

Then a layperson, with a desire to find a solution and cure for a loved one, decided over time that it was silly to rely on just one solution. Why don't we combine them in a step-by-step process - thus, leaving no stone unturned and offering the best possible outcome? First he recommended doing an assessment with blood tests, parasite screening and eliminating weaknesses in nutrition and its possible causes. Then strengthening the immune system by adding in supplements for this, and to strengthen the liver with the ability to detoxify with herbs, nutrition, juicing and coffee enema discovered by the late Max Gerson who was a German physician who developed the Gerson therapies. This vegan diet never cured an O Blood Type. An important observation this layperson used to reason the Blood Type Diet. Then add in laetrile and parasite cleanses for a month. Altering the diet for 21 days to organic juices and living food, then slowly changing to a diet based on origins of the "Eat To Your Blood Type Diet." After evaluating blood tests in month two, continuing with injections as required if the cancer has stopped growing, and adding high levels of Vitamin C via a drip, he theorized, would help speed up results and clean out the dead cancer cells.

### **If it hasn't slowed or stopped the cancer!**

He then added in the High pH Therapy Program. This intensive IV combination of 20 minerals is so promising, with me witnessing a fist-sized mouth cancer completely dissolving within a few weeks, metastatic breast cancer in the liver, spine and hip completely dissolving after a month or two of treatment. This is truly exciting. People with massive bone cancer that couldn't walk, walking after a few days of this treatment, and the cancer stopped growing the first week of the treatment. This treatment can take its toll on the body, so it made sense to prepare the person the month prior.

Then after this very exhausting therapy, rebuilding the body with good healthy food, hyperbaric oxygen, massage etc., just makes sense when the body has gone through the equivalent of major surgery.

This is a very brief summary of the reason we have adopted this program; early trials are nothing short of exciting, and we believe the controlled organic environment at the XYZ-Wellbeing ReTreat Facility, Alternative Hospital, whatever you wish to call it, may produce results never seen before in the elimination of cancer.

Included in the program is a synergistic balance of every service we offer, under the top link "ReTreat Services," as well as experienced use of these combination's of what we call ancient wisdom.

### **What therapies are included in the XYZ-Wellbeing ReTreat Facility Three-Month Program?**

X-rays, Ultrasound, PET Scans, Thermal Imaging, Live Blood Analysis, Iridology, Blood Tests, Stool Parasite Tests, Nutritionists trained in the Eat To Your Blood Type Diet, Naturopaths overseeing additional health challenges, Infrared Treatments including Infrared Saunas, Colonic Hydrotherapy for assistance in eliminating waste and providing a good environment for herb and coffee enemas, Hyperbaric Oxygen Therapy, Mind and past trauma clearing complemented with meditation and sound therapy.

### **Then we add in the ancient wisdom therapies of:**

Vitamin B17, Ozone Therapy, DMSO Dimethyl Sulfoxide, Vitamin C infusion, Laetrile vitamin B17, High pH Cesium Mineral Therapy and two unique therapies that we can not release the details: until the trial is complete.

### **Sounds overwhelming?**

Well you're not on your own if you want help doing this at home, we will hold your hand and assist you every step of the way! I can say that in the trials we have done, clients don't want to go home they feel so good and so pampered. You now do some reading in the links in this section and see how good they all look on their own. Then contact us and register, because time is of the essence and the earlier you choose this program the better possible the outcome can be made.
